

timeXtender Adapter: SAP R/3

Easy Data Extraction and Migration from SAP/R3 to Microsoft SQL Server

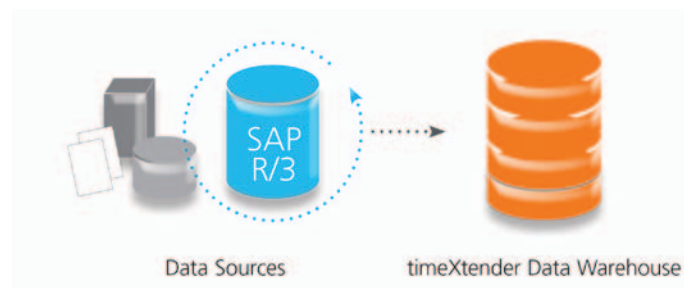

Organizations store data in a variety of different source systems. Therefore, the data warehouse must be able to integrate with many different systems and files, and those data must be part of the ETL process in order to provide a clear and accurate picture of the state of the business.

Fast Integration

timeXtender connects to multiple data source to ensure that the final output in reports and dashboards is valuable and trustworthy. For SAP R/3 timeXtender comes with a specially designed adapter that makes the connection from SAP R/3 to Microsoft SQL Server fast and painless.

timeXtender has integrated the Xtract IS component from Theobald Software into the SAP R/3adapter. This component is based on SAP certified technology.

Using the adapter, minimal manual effort is required to extract data from SAP R/3 and into a SQL Server based data warehouse. With a few mouse clicks, you can extract mass data with the highest degree of performance and stability.

Key Features

- **Xtract Table.** Extracts data quickly and reliably. Depending on your need, data can also be restricted with any Where statement. There is also support for Dynamic SQL statements, including SSIS variables.
- **Xtract Query.** Makes type-safe SSIS data flows from SAP Queries available in just seconds.
- **DeltaQ.** Connects to the extractor API of the SAP system and thereby utilizes the functionality that SAP's Business Information Warehouse (BW) systems use to manage their data supply from the ERP production system. It enables SAP controlled incremental loads.
- **BAPI.** Makes it possible to call BAPIs and RFC function modules directly from your SSIS data flow.
- **BW Cube.** Extracts attributes and key measure from BW Cube and BEx Queries. Complex multidimensional data structures are turned into relational data that are easy to handle.

SAP and SAP R/3 are registered trademarks of SAP AG in Germany and in several other countries. ERPConnect is a legal trademark of Theobald Software GmbH.
